DBsign BBWS v4.0 (c) 2010-2011

DBsign BlackBerry Web Signer in the Torch 9800 Web Browser

Features and Benefits:

- **Simple Deployment:** installs like any other BlackBerry application.
- **User Friendly:** no user training required.
- **Simple Integration:** no complex learning curve for web developers.
- **Supports All Web Applications:** supports all major application environments (.Net, J2EE, PHP, and more).
- **Secure Operation:** Uses FIPS 140-2 validated cryptography. Fully supports SHA-256/384/512 message digest algorithms. DBsign Security Server is NIAP CCEVS validated as required by DoD directive 8500.1.
- **Smart Card Support:** compatible with the BlackBerry Smart Card reader, HSPD-12 PIV cards, and DoD Common Access Cards.
- **System Requirements:** BlackBerry Device running BlackBerry® OS 4.5 and higher, DBsign 4.0 Security Server.
